Subject index

Ab initio
On the release of translational energy when stable intermediate ion–neutral complexes dissociate 183
Alkylarenium ions
Proton induced methyl group shifts in gaseous xylenium ions. Distinguishing isomers by gas-phase titration 167
Anthracenyl
Time-dependent mass spectra and breakdown graphs. 20. Bromoanthracene. Heat of formation of the anthracenyl ion 39
Artifacts
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
Asymmetric bonding
$Cr^+(H_2)_n$ clusters: asymmetric bonding from a symmetric ion 17

Bromoanthracene
Time-dependent mass spectra and breakdown graphs. 20. Bromoanthracene. Heat of formation of the anthracenyl ion 39
1-Butanethiol
The unimolecular chemistry of ionized 1- and 2-butanethiol 63
2-Butanethiol
The unimolecular chemistry of ionized 1- and 2-butanethiol 63

C_2H_2O
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
C_3H_4O
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
C_4H_6O
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
$C_2H_2O^+$
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
$C_3H_4O^+$
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
$C_4H_6O^+$
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
CBS
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
Collision-induced dissociation
Previously uncharacterized ions observed in the high energy collision-induced dissociation mass spectra of peptides containing S-alkyl cysteine 317
Cyclohexyl cyanide
Isomerization of the molecular ion of cyclohexyl cyanide to an ionized bicycloheptane imine species competing with direct ring-opening 193
Cysteine
Previously uncharacterized ions observed in the high energy collision-induced dissociation mass spectra of peptides containing S-alkyl cysteine 317

1,4-Dihydroxy acids
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
8,11-Dihydroxyarachidonic acid
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
9,12-Dihydroxyarachidonic acid
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
11,14-Dihydroxyarachidonic acid
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
12,15-Dihydroxyarachidonic acid
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
9,12-Dihydroxystearic acid
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
10,13-Dihydroxystearic acid
1,4-Dihydroxy fatty acids: artifacts by reduction of

di- and polyunsaturated fatty acids with sodium borohydride 269
Density functional calculation
Time-dependent mass spectra and breakdown graphs. 20. Bromoanthracene. Heat of formation of the anthracenyl ion 39
Density functional theory
The hydrogen-bridged radical cation $[H_2O\ldots H\ldots O=C\text{–}OH^+$: A combined experimental and theoretical study of its stability and dissociation chemistry 117
Deoxypyridinoline
Low- and high-energy collision-induced dissociation of pyridinoline and deoxypyridinoline ions using Fourier transform ion cyclotron resonance electrospray and liquid secondary-ion magnetic sector mass spectrometry 377
Deuteronated aromatic derivatives
Fragmentation of deuteronated aromatic derivatives: the role of ion–neutral complexes 157
Dicyanobenzenes
On-line electrospray mass analysis of photoallylation reactions of dicyanobenzenes by allylic silanes via photoinduced electron transfer 371
Dihydroxyfumaric acid
The hydrogen-bridged radical cation $[H_2O\ldots H\ldots O=C\text{–}OH^+$: A combined experimental and theoretical study of its stability and dissociation chemistry 117
Dissociation mechanisms
A tandem mass spectrometry study of $[C_6,H_5,O]^+$ ions 211
Doubly charged peptide
Proton locations in doubly charged peptides and association with specific fragmentation pathways 331

E-coli
A strategy for the identification of proteins localized to subcellular spaces: application to *E. coli* periplasmic proteins 303
Electrospray
Determination of pesticide epitopic density in protein immunoconjugates by electrospray mass spectrometry 395
Electrospray ionization
A new electrospray-ionization time-of-flight mass spectrometer with electrostatic wire ion guide 241
False sugar sequence ions in electrospray tandem mass spectrometry of underivatized sialyl-Lewis-type oligosaccharides 283
Electrospray mass analysis
On-line electrospray mass analysis of photoallylation reactions of dicyanobenzenes by allylic silanes via photoinduced electron transfer 371
Electrostatic ion guide
A new electrospray-ionization time-of-flight mass spectrometer with electrostatic wire ion guide 241

Fourier transform ion cyclotron resonance electrospray ionisation mass spectrometry
Low- and high-energy collision-induced dissociation of pyridinoline and deoxypyridinoline ions using Fourier transform ion cyclotron resonance electrospray and liquid secondary-ion magnetic sector mass spectrometry 377
Fragmentation
Fragmentation of deuteronated aromatic derivatives: the role of ion–neutral complexes 157
Fragmentation mechanism
The unimolecular chemistry of ionized 1- and 2-butanethiol 63
Fragmentation pathways
Proton locations in doubly charged peptides and association with specific fragmentation pathways 331
Fragmentation reactions
Mixed-site vs. charge-site-remote fragmentation reactions of long-chain quaternary ammonium ions 223
FT-ICR spectroscopy
The $[^+CH_2OH,H_2]$ and $[^+CH_2OH,2H_2O]$ solvated ions 107
FTMS
Evaluation of MALDI-FTMS for analysis of peptide mixtures generated by ladder sequencing 291
Fucose migration
False sugar sequence ions in electrospray tandem mass spectrometry of underivatized sialyl-Lewis-type oligosaccharides 283

G2
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
Gel electrophoresis
Towards monitoring of protein purification by matrix-assisted laser desorption ionization mass spectrometry 339

Heat of formation
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
High energy CID
Protein sequence and structural studies employing matrix-assisted laser desorption ionization–high energy collision-induced dissociation 357

Hydroboration
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
Hydrogen bonding
Protonation of isomeric methoxyhexenes. Effects of double bond...H^+...OCH_3 interaction 137
Hydrogen cyanide loss
Isomerization of the molecular ion of cyclohexyl cyanide to an ionized bicycloheptane imine species competing with direct ring-opening 193
Hydrogen transfer
Protonation of isomeric methoxyhexenes. Effects of double bond...H^+...OCH_3 interaction 137
Hypervalent radicals
Protonation of isomeric methoxyhexenes. Effects of double bond...H^+...OCH_3 interaction 137

Immunoconjugates
Determination of pesticide epitopic density in protein immunoconjugates by electrospray mass spectrometry 395
Instrumental effects
Instrumental effects in the analysis of polymers of wide polydispersity by MALDI mass spectrometry 387
Ion structures
A tandem mass spectrometry study of $[C_6,H_5,O]^+$ ions 211
Ion thermochemistry
A tandem mass spectrometry study of $[C_6,H_5,O]^+$ ions 211
Ion/molecule reaction
Proton induced methyl group shifts in gaseous xylenium ions. Distinguishing isomers by gas-phase titration 167
Ion-molecule reactions
Modeling radiative association kinetics 1
Ion–neutral complex
The hydrogen-bridged radical cation $[H_2O...H...O=C–OH^+$: A combined experimental and theoretical study of its stability and dissociation chemistry 117
Ion–neutral complexes
Fragmentation of deuteronated aromatic derivatives: the role of ion–neutral complexes 157
On the release of translational energy when stable intermediate ion–neutral complexes dissociate 183
Ionization energy
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
Isotope labelling
Isomerization of the molecular ion of cyclohexyl cyanide to an ionized bicycloheptaine imine species competing with direct ring-opening 193

Ketene
Ketene and ketene radical cation: the unusual effect of methyl and dimethyl substitution 73
Kinetic
The unimolecular chemistry of ionized 1- and 2-butanethiol 63

Ladder
Evaluation of MALDI-FTMS for analysis of peptide mixtures generated by ladder sequencing 291
Ligand exchange
The $[^+CH_2OH,H_2]$ and $[^+CH_2OH,2H_2O]$ solvated ions 107
Liquid secondary-ion mass spectrometry
Low- and high-energy collision-induced dissociation of pyridinoline and deoxypyridinoline ions using Fourier transform ion cyclotron resonance electrospray and liquid secondary-ion magnetic sector mass spectrometry 377
Long-chain quaternary ammonium ions
Mixed-site vs. charge-site-remote fragmentation reactions of long-chain quaternary ammonium ions 223

MALDI
Determination of pesticide epitopic density in protein immunoconjugates by electrospray mass spectrometry 395
Evaluation of MALDI-FTMS for analysis of peptide mixtures generated by ladder sequencing 291
Protein sequence and structural studies employing matrix-assisted laser desorption ionization–high energy collision-induced dissociation 357
MALDI mass spectrometry
Instrumental effects in the analysis of polymers of wide polydispersity by MALDI mass spectrometry 387
Mass spectrometry
Previously uncharacterized ions observed in the high energy collision-induced dissociation mass spectra of peptides containing S-alkyl cysteine 317
Towards monitoring of protein purification by matrix-assisted laser desorption ionization mass spectrometry 339
Matrix-assisted laser desorption/ionization
Radial velocity distributions of molecular ions produced by matrix-assisted laser desorption/ionization 259
Matrix-assisted laser desorption/ionization
Towards monitoring of protein purification by matrix-assisted laser desorption ionization mass spectrometry 339

Metastable ions
Isomerization of the molecular ion of cyclohexyl cyanide to an ionized bicycloheptane imine species competing with direct ring-opening 193
1,2-Methyl shift
Proton induced methyl group shifts in gaseous xylenium ions. Distinguishing isomers by gas-phase titration 167
MIKE spectrometry
Proton locations in doubly charged peptides and association with specific fragmentation pathways 331
MIKES
Unimolecular and collision-induced dissociation study of CS_2^{2+} with Ar at high collision energy 49
Mixture analysis
Proton induced methyl group shifts in gaseous xylenium ions. Distinguishing isomers by gas-phase titration 167
Molecular ion
Radial velocity distributions of molecular ions produced by matrix-assisted laser desorption/ionization 259
MS/MS
Previously uncharacterized ions observed in the high energy collision-induced dissociation mass spectra of peptides containing S-alkyl cysteine 317

$NaBH_4$ reduction
1,4-Dihydroxy fatty acids: artifacts by reduction of di- and polyunsaturated fatty acids with sodium borohydride 269
Neutralization–reionization
Protonation of isomeric methoxyhexenes. Effects of double bond...H^+...OCH_3 interaction 137

Oligosaccharide
False sugar sequence ions in electrospray tandem mass spectrometry of underivatized sialyl-Lewis-type oligosaccharides 283
Orthogonal acceleration
A new electrospray-ionization time-of-flight mass spectrometer with electrostatic wire ion guide 241

PEPICO
The unimolecular chemistry of ionized 1- and 2-butanethiol 63
Peptide
Previously uncharacterized ions observed in the high energy collision-induced dissociation mass spectra of peptides containing S-alkyl cysteine 317
Peptide sequence
Protein sequence and structural studies employing matrix-assisted laser desorption ionization–high energy collision-induced dissociation 357
Peptides
Evaluation of MALDI-FTMS for analysis of peptide mixtures generated by ladder sequencing 291
Pesticides
Determination of pesticide epitopic density in protein immunoconjugates by electrospray mass spectrometry 395
Photoallylation reactions
On-line electrospray mass analysis of photoallylation reactions of dicyanobenzenes by allylic silanes via photoinduced electron transfer 371
Photoinduced electron transfer
On-line electrospray mass analysis of photoallylation reactions of dicyanobenzenes by allylic silanes via photoinduced electron transfer 371
Polydispersity
Instrumental effects in the analysis of polymers of wide polydispersity by MALDI mass spectrometry 387
Polymers
Instrumental effects in the analysis of polymers of wide polydispersity by MALDI mass spectrometry 387
Post-translational modification
Protein sequence and structural studies employing matrix-assisted laser desorption ionization–high energy collision-induced dissociation 357
Protein purification
Towards monitoring of protein purification by matrix-assisted laser desorption ionization mass spectrometry 339
Proteins
A strategy for the identification of proteins localized to subcellular spaces: application to *E. coli* periplasmic proteins 303
Proton transfer reaction
Proton induced methyl group shifts in gaseous xylenium ions. Distinguishing isomers by gas-phase titration 167
Protonation
Protonation of isomeric methoxyhexenes. Effects of double bond...H^+...OCH_3 interaction 137
Pyridinoline
Low- and high-energy collision-induced dissociation of pyridinoline and deoxypyridinoline ions using Fourier transform ion cyclotron resonance electrospray and liquid secondary-ion magnetic sector mass spectrometry 377

Radial velocity distribution
Radial velocity distributions of molecular ions produced by matrix-assisted laser desorption/ionization 259
Radiative association
Modeling radiative association kinetics 1

Reaction pathways
Unimolecular and collision-induced dissociation study of CS_2^{2+} with Ar at high collision energy 49
Rearrangement
Isomerization of the molecular ion of cyclohexyl cyanide to an ionized bicycloheptane imine species competing with direct ring-opening 193
RRKM-QET
Time-dependent mass spectra and breakdown graphs. 20. Bromoanthracene. Heat of formation of the anthracenyl ion 39

SDS-PAGE
A strategy for the identification of proteins localized to subcellular spaces: application to *E. coli* periplasmic proteins 303
Sequencing
Evaluation of MALDI-FTMS for analysis of peptide mixtures generated by ladder sequencing 291
Solvated ion
The $[^+CH_2OH, H_2]$ and $[^+CH_2OH, 2H_2O]$ solvated ions 107
Sugar ion
False sugar sequence ions in electrospray tandem mass spectrometry of underivatized sialyl-Lewis-type oligosaccharides 283
Supersonic beam
A new electrospray-ionization time-of-flight mass spectrometer with electrostatic wire ion guide 241
Symmetric ion
$Cr^+(H_2)_n$ clusters: asymmetric bonding from a symmetric ion 17

Tandem mass spectrometry
A tandem mass spectrometry study of $[C_6, H_5, O]^+$ ions 211
False sugar sequence ions in electrospray tandem mass spectrometry of underivatized sialyl-Lewis-type oligosaccharides 283
Protein sequence and structural studies employing matrix-assisted laser desorption ionization–high energy collision-induced dissociation 357
The hydrogen-bridged radical cation $[H_2O \ldots H \ldots O = C\text{–}OH^+$: A combined experimental and theoretical study of its stability and dissociation chemistry 117
Thermally induced dissociation
A new electrospray-ionization time-of-flight mass spectrometer with electrostatic wire ion guide 241
Time-of-flight
A new electrospray-ionization time-of-flight mass spectrometer with electrostatic wire ion guide 241
Time-resolved photoionization mass spectrometry
Time-dependent mass spectra and breakdown graphs. 20. Bromoanthracene. Heat of formation of the anthracenyl ion 39
Translational energy
On the release of translational energy when stable intermediate ion–neutral complexes dissociate 183
